

Digital Campus Buddy

Your Smart Companion for Campus Life

A unified mobile and web platform designed to streamline the student experience, foster community, and provide essential, real-time campus resources.

Project Leadership Team

The Digital Campus Buddy project is driven by a multidisciplinary team ensuring robust development and user-centric design.

Alex Morgan

Project Lead – Defining strategic vision and overall project management.

Priya Singh

UX/UI Designer – Focused on intuitive and accessible interface development.

Jamal Carter

Backend Developer – Building scalable architecture and secure API services.

Mei Chen

Frontend Developer – Implementing responsive and cross-platform user interfaces.

Sofia Alvarez

QA & Testing – Ensuring platform stability, performance, and bug-free delivery.

Our Core Mission: Enhancing the Campus Experience

Digital Campus Buddy aims to bridge the communication gap and centralize scattered resources, making university life more manageable and connected.

Key Objectives for Digital Campus Buddy

Foster Seamless Connection

Connect students and departments effortlessly, building a stronger, more engaged campus community.

Deliver Real-Time Information

Provide instant updates on campus events, class schedule changes, and critical university announcements.

Facilitate Easy Communication

Enable simple and effective communication through dedicated chat groups and direct student-to-student messaging.

Streamline Interaction

Consolidate academic management, social networking, and resource access into one cohesive mobile application.

Defining Our Stakeholders

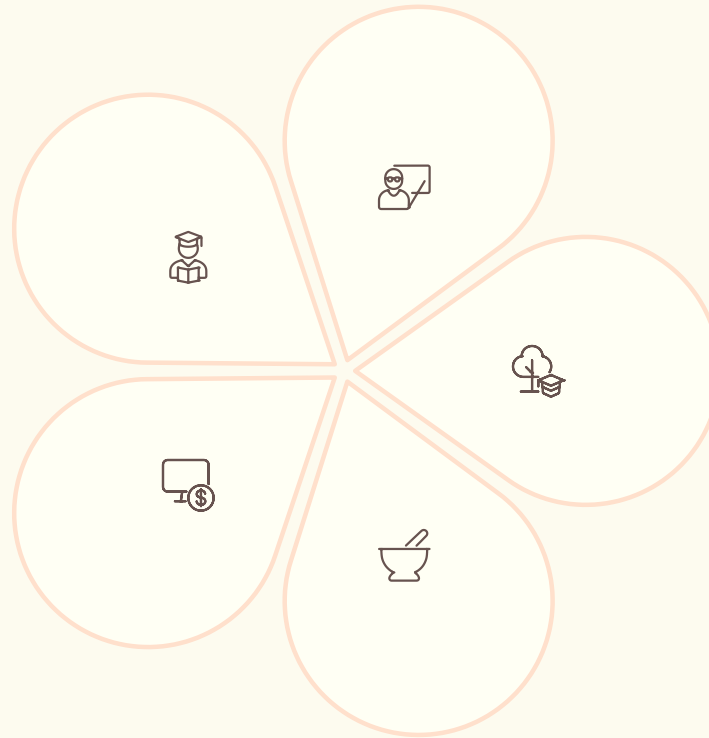

Identifying all key parties ensures the platform delivers comprehensive value and meets diverse needs across the university ecosystem.

Students

Primary users seeking connection, academic tools, and event discovery.

Local Businesses

Integration for exclusive student deals, advertising opportunities, and community outreach campaigns.

Faculty & Staff

Utilizing the app for efficient announcements, scheduling, and direct student outreach.

University Administration

Leveraging the platform for mass communication, gathering data insights on student engagement, and emergency alerts.

Campus Clubs & Organizations

Tools for event promotion, managing RSVPs, and coordinating member communication effectively.

TECHNICAL BLUEPRINT

Strategic Technology Stack

We have selected a robust, scalable, and modern tech stack to ensure high performance and cross-platform compatibility for Digital Campus Buddy.

Languages, Frameworks, and Tools

A breakdown of the core technologies powering the application's infrastructure and user interface.

1

Frontend Excellence

React.js (Web) and React Native (Mobile) ensure a native feel and efficient cross-platform development.

2

Backend Power

Node.js with Express.js provides a fast, non-blocking, and scalable server-side environment for handling API requests.

3

Flexible Database

MongoDB is used as the primary database for its flexible schema, perfect for evolving campus data requirements.

4

Key Services & APIs

Integration of Google Maps for location services and Firebase for reliable, low-latency real-time chat functionality.

5

Design & Prototyping

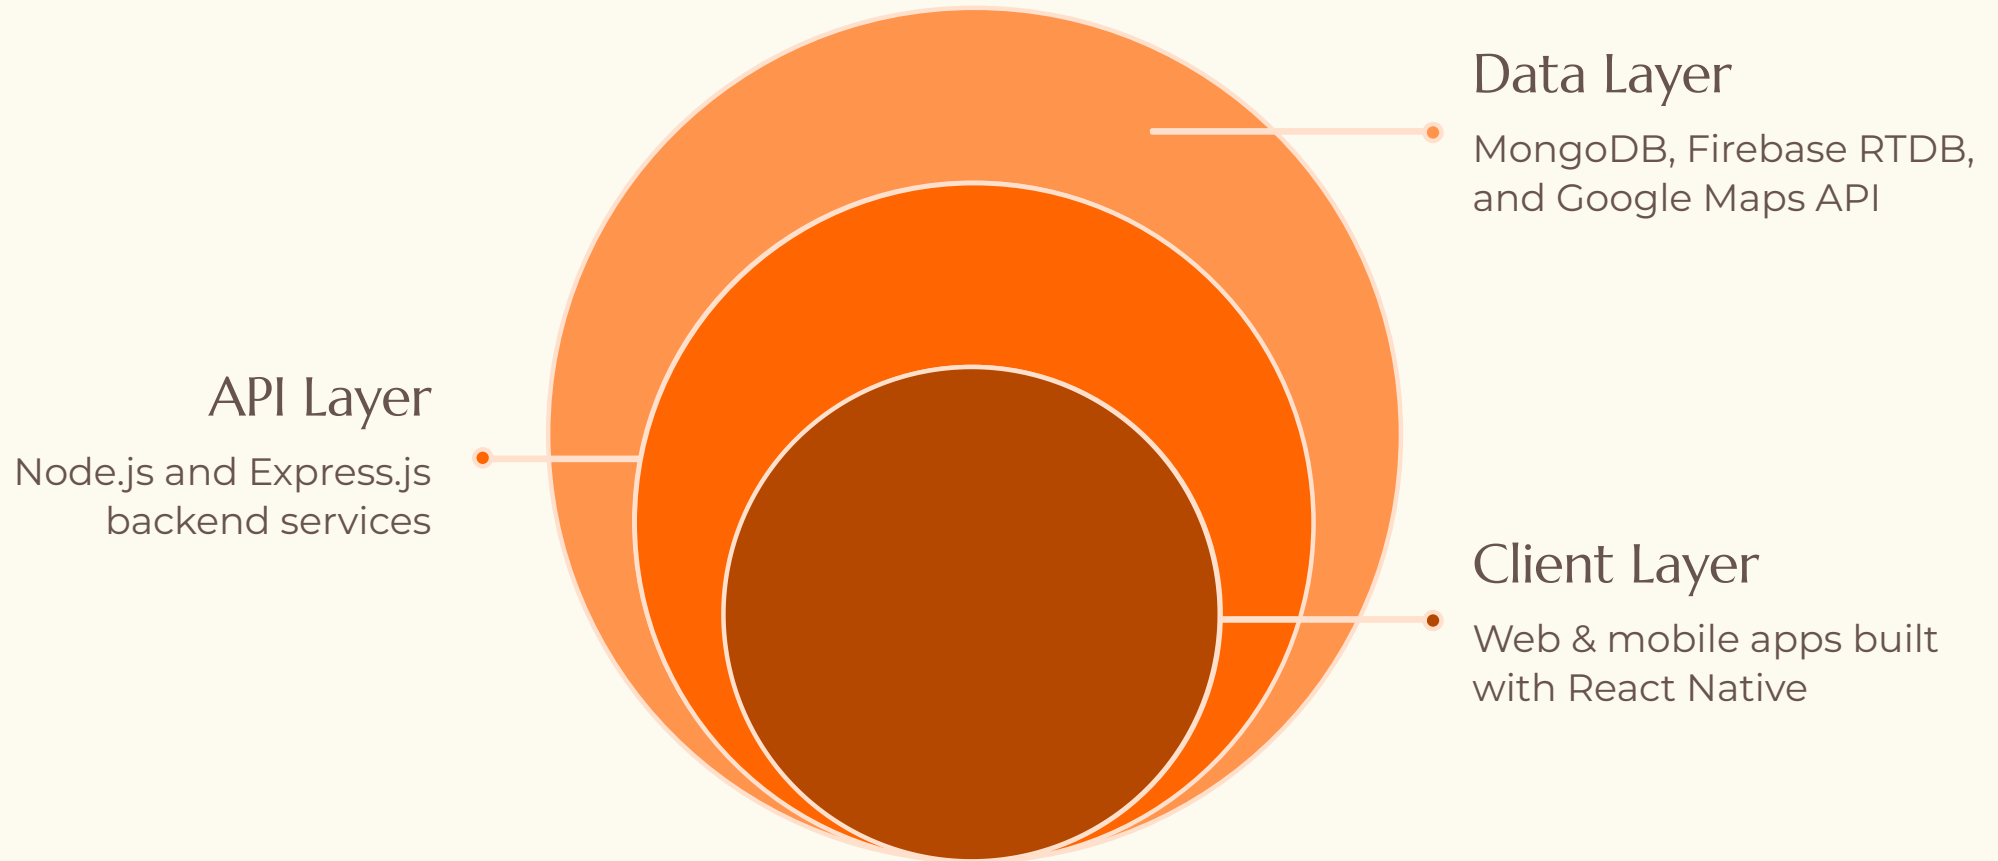

Figma is the central tool for collaborative UI/UX design, ensuring a cohesive and validated user flow.

6

Deployment & Hosting

Utilizing Docker for containerization and AWS for secure, scalable cloud hosting and infrastructure management.

Platform Architecture Overview

This microservices-inspired architecture ensures that individual components can be updated and scaled independently, maximizing platform reliability and speed.

Front-End View: Home Screen Design

The home screen is the central hub, designed for instant clarity and easy navigation to essential features.

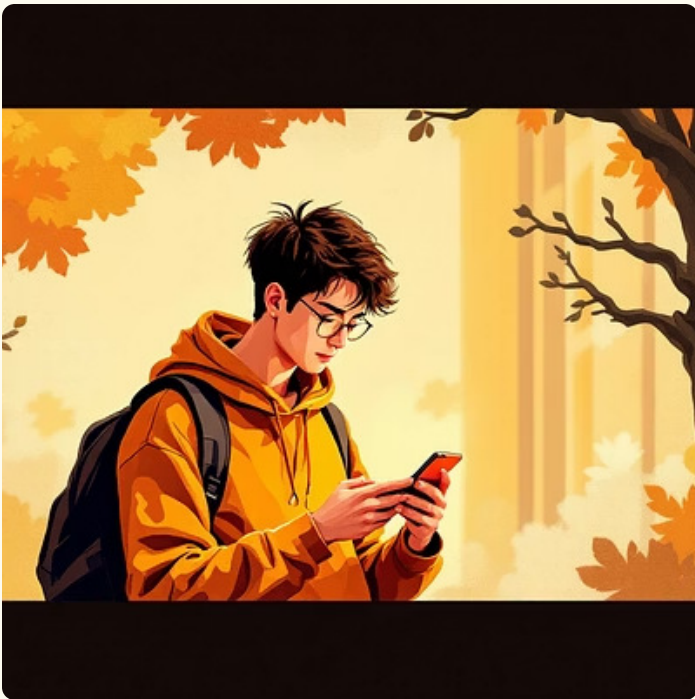

- Clean dashboard showing a personalized campus news feed and upcoming academic or social events.
- Notifications area for alerts on new messages, critical updates, and deadlines.
- Location-based event suggestions powered by Google Maps API with a simple map preview card.
- Intuitive, icon-based navigation bar for instant access to core features: Chat, Events, Profile, and Resources.
